Christian Parks
Software & Web Developer

Experience

Feb. 2021 – Present – Full Stack Web Development – Fulfillment Express Inc.
Reduced development cycle time by debugging, identifying coding errors, and implementing new and more effective code. Worked closely with C-Level executives in defining, designing and rapidly implementing product concept ideas for enterprise software. By rapidly delivering software redesigns, overall cycle time was reduced providing more responsive feedback to stakeholders.

Key Skills & Responsibilities.
- Debug and adapt existing code base using Vue.JS, JQuery, and Javascript
- Utilized Laravel alongside PHP to construct efficient server side code
- Developed MySQL tables and adapted code
- Tested and corrected code within the constraints of the QA program
- Translated (From Spanish) and corrected notes from previous developers

2020 - Freelance web programmer - Quilter Labs, LLC
Worked closely with marketing executives and onsite team to develop a "Custom Shop" function enabling the user to select the components of an amplifier built to their specifications.

Key Skills & Responsibilities.

- Debug and adapt existing code, develop new code on a very narrow timeline
- Javascript
- CSS
- CMS (Expression engine)

- French 3

Summary

I want to ***build your business with you*** and am looking for an opportunity to contribute to your team's success. I am relentlessly ***passionate about technology*** and problem solving. I love the feeling of accomplishment when working with an enthusiastic team in our pursuit of ***excellent development from the top to bottom*** of the stack. I believe my skills would be an excellent fit for most any team where ***problem solving, a solid work ethic***, and a willingness to be open minded and hard work is required.
